## CERTIFICATION OF POPULATION ESTIMATES

The January 1, 1986 estimate may be certified to the Controller for use in the distribution of certain State tax subventions. Please note, these estimates will not be automatically certified. No estimate is certified by the Department of Finance unless a written request is received from the local jurisdiction.

All cities and counties should be aware that Revenue and Taxation Code 1005.6 has been revised. It is no longer a requirement that a jurisdiction must have had a census in the past five years to recertify their population. Department of Finance estimates can now be certified each year between decennial censuses. At the time of the next decennial census, in 1990, all cities and counties will be automatically recertified. Do not request certification unless your January 1, 1986 population figure is higher than your current certified population.

Section 2107.2 of the Streets and Highway Code and Section 11005.6 of the Revenue and Taxation Code provide that a request to certify population must be received by June 15 (within 45 days of the completion of the estimate). Otherwise the estimate cannot be certified. Requests for certification received by May 15 will be certified for June allocations; those received between May 15 and June 15 will be certified for July allocations.

Jurisdictions should always certify higher population estimates immediately. If you feel your jurisdiction's population is higher than the January 1, 1986 estimate, you should still certify the population. Estimates which are subsequently revised may be recertified at the revised population figure.

For certification, submit a written request citing your jurisdiction's name and your January 1, 1986 total population to the Department of Finance, Population Research Unit, 1025 P Street, Sacramento, CA 95814. The form on the reverse of this letter can be used for certification.
